

## Purchase Order Received Statuses

Last Modified on 03/31/2022 3:53 pm EDT

Status codes used to flag P.O. items to mark them as Received, Not Received, etc. Status codes are maintained under Setup > P.O. Received Statuses.

The P.O. status can be seen on the P.O. detail line. The status can be entered upon entry or changed at any time; however User Account Restrictions are considered.
